

Apprently, the FCC board beliefs itself to be above the concerns and trust of the American people, but rest assured that the sellout activites of the board to appease big media's grab for control over the newsmedia and its inherent freedoms will not go unnoticed. The Current violations of FCC Concerning "Cross-Ownership laws are being ignored by the you(the board) and will most likely be ignored while paying lipsevice to the public. Thankfilly organizations like "FAIR" ( who should be running the FCC) have, once again found out about your backdoor tactics to strip away the peoples rights. Not only am I not pleased with your intent to offer such a blantant breach of trust, but I will gather every resource to ensure that your underhanded practices will not go without notice. Your behavior is an example of why the public has so little trust in the government. I would almost expect that your next attempt at viloating this trust would be akin to "Hitlerism" But then again!

he would not be bought and sold like cheap trash. Redeem your selfs by adhearing to the responcibilities of your positions. If you (the board)consider yourselves as Americans then I would be ashamed to be one. Resign your office and let honest take the helm, people who have a sense of pride and self respect for the office and the public at large. Your failure to withstand the pressures of the large multimedia corporations have allowed us (the public) to see your weak fiber, which is not the type of people this country nor any other country needs in a decision making office. I will be addressing this issue as well as the other viloations with all of congress inorder to prevent your continued service.
